

# MEDILINE

TEAM LEADER : PULLAIAHGARI LAHARI

INSTITUTE

GURUNANAK INTITUTE OF TECHNOLOGY

IDEA DOMAIN : MEDICAL SERVICES

IDEA : TO REACH OUT THE PEOPLE  
WHO ARE DIAGNISED OF  
FATAL ILLNESS

# IDEA DETAILS

- In India health care has become one of the largest and important sector in terms of revenue and employment .Increasing and strengthening of coverage, services due to which the cost of medication has also increased drastically.
- But the poor hasn't fully reached into the eyes of the government and medical services.
- We have designed a solution which can help the poor to get access to the medical services easily.

# MEDICAL SERVICES IN INDIA

- Public healthcare service is free for Indian residents but has shortage of hospitals, particularly in rural areas and semi urban areas due to lack of equipment and resources.
- People in rural area not capable of paying the expenses in the private hospitals.
- There are many people who wanted to offer free medication to the poor people/needy but cannot reach them.
- Even about the medical camps the people are not aware due to lack of advertising.

# MEDICAL CAMPS IN INDIA

- Medical camps provide awareness and initial care to people in life-threatening conditions whether it is a sponsored medical and diagnostic service or treatment.
- India organized world's largest free medical camp "RK HIV AIDS Research and care center".
- Even students from medical colleges conduct camps .
- Even many organisation like WHO provide funding.

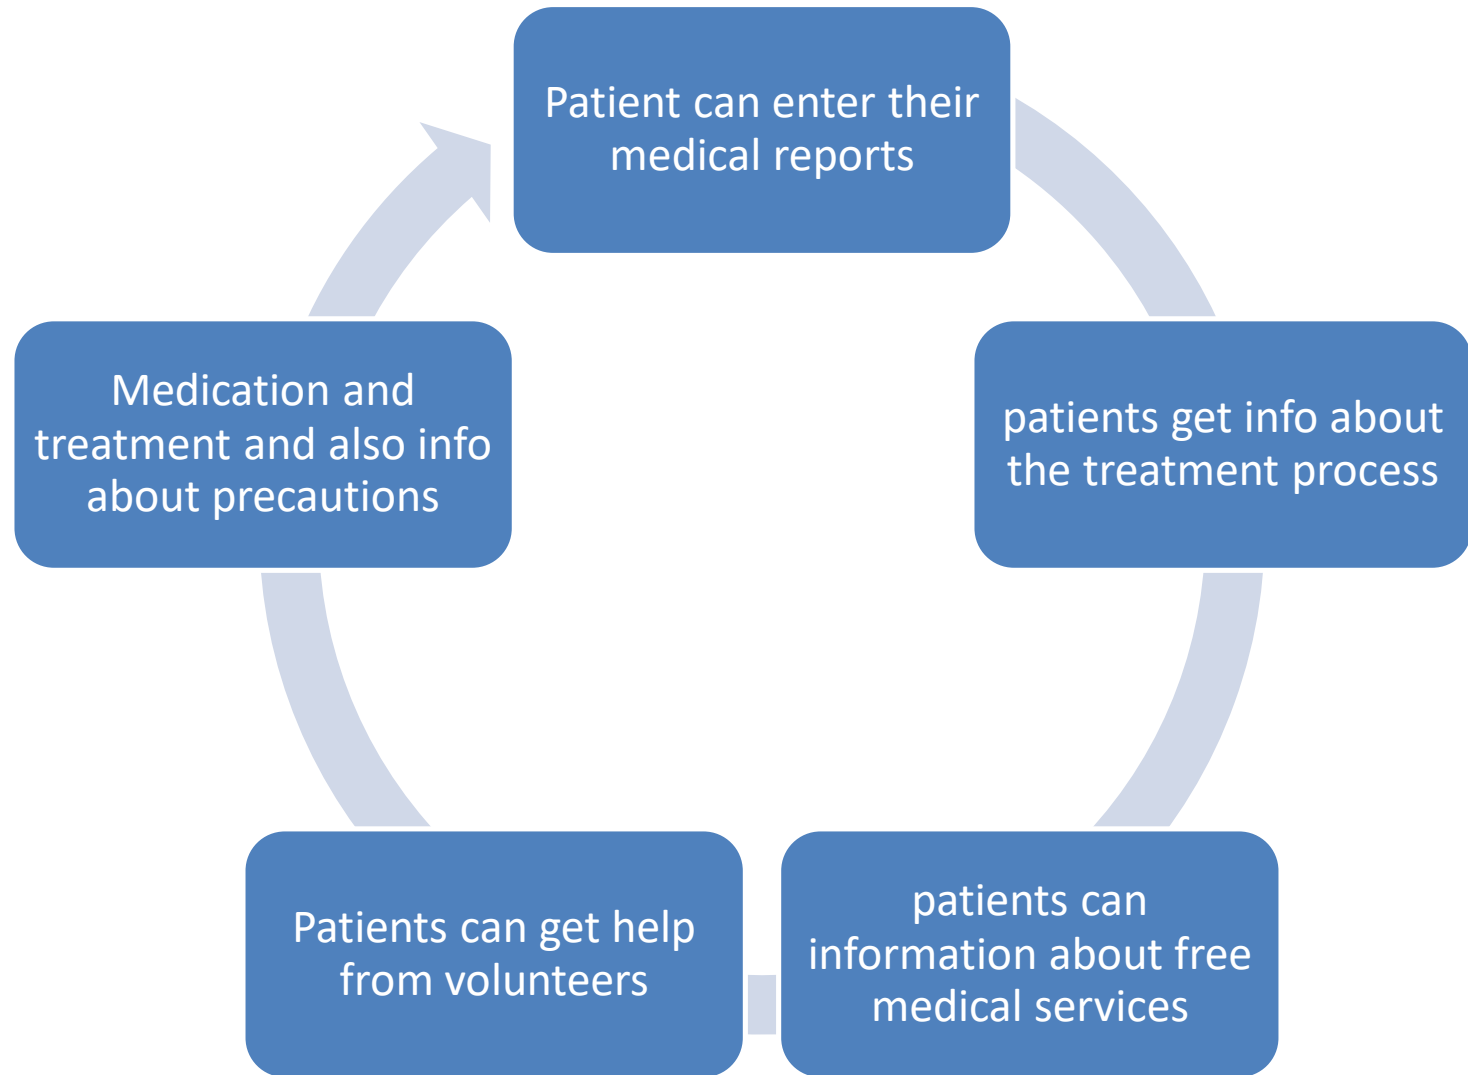

# SOLUTION

- Hence we proposed an idea which can bring the victim to the notice of beneficiary.
- This application can roughly diagnose the disease based upon the symptoms entered into the app which can further clarified by the medical check up.
- The patients can also update their medical reports and about their economic status in this application through which they can get information about their diseases and further preventions.
- The poor can expect funding from many organisations/sponsors and from donations directly to the patient.

# EXECUTION

- When people are having some symptoms they can go through our application by which they can get a diagnosis of the disease which can be confirmed by the local govt or private hospitals or through medical camps provided in the application
- If the economical status of the patient is poor he/she can apply for funding .
- The volunteers who are interested can go through the patient details and can proceed with the funding/help if interested.

# PROCESS

# BENEFITS

- The patients can get funding if they are poor for their medical checkup and treatment
- The patients can also get aware of free medical camp organized by the volunteers and medical students
- Even the volunteers can help the patients directly without any broker
- They can get information about the preventions and safety measures including diet plans
- Even medical students can go through the cases for their study purpose.
- Advertisement of the medical camps can be made on the app.

# THANK YOU

I THANK MY TEACHERS AND MY PARENTS WHO  
HAVE BEEN SUPPORTING ME ALL ALONG
